

1. Download Java (JVM)
2. Install Python and Jupyter Notebook (Anaconda Navigator)
3. Download PySpark
4. Download winutils.exe
5. Set the PATH variable to the folder containing PySpark, Hadoop and Python
6. Start PySpark in the terminal
7. Go to Jupyter Notebook and type:
 Import findspark
 Findspark.init()
8. Now PySpark can be used on your local machine
